

Please find my response, each point relates to your questions:-

1. I don't believe that the present route is justified given the traffic studies available - I believe that the route is having a case built round it.
2. The money needed to fund this present route is excessive and a more cost effective and beneficial congestion easier should and could be found.
3. The answer to this question is certainly NO.
4. One of the problems with the AWPR, is that the reason for the road, keeps changing, one minute it is to relieve congestion in the city centre, the next it is part of the North East Strategic road network. The present route means something different to different people and what we need is a lot of honesty, as to what or who is really behind the road.

I would if elected, try to ensure that the full facts and information are made available to the public. I would canvass other Councillors and MSPs to ensure we are all aware of the facts before any further decisions are made and any more of the tax payers money is wasted. This may mean a delay or even a complete rethink on what is needed in Aberdeen, but it is better to be delayed and get it right than to be wrong and on time!
